7 I am also inclined to think that we may wait some time before introducing a rule about vaccination.

I agree. An order to this effect may be issued

8 Meanwhile if the School authorities & the Sanitary authorities work together, all unprotected boys in Schools can be got vaccinated with very little trouble.

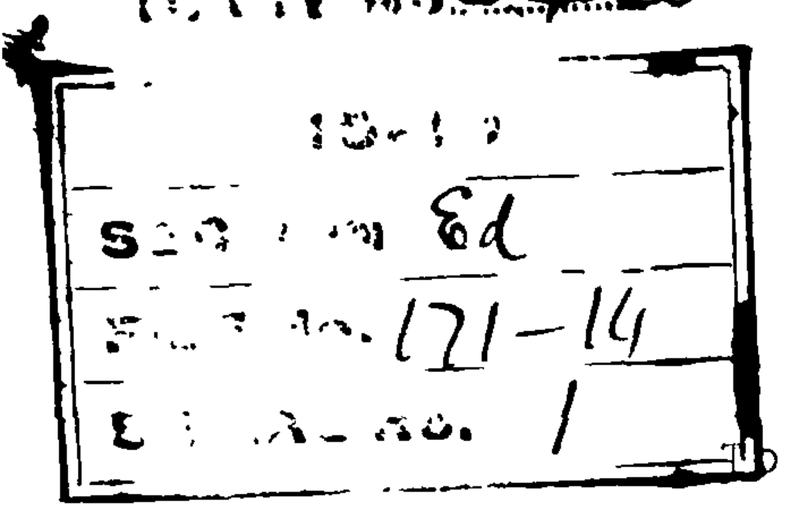
No. 6187
Exec I

Office of the Sanitary Commissioner
with the Government of Mysore,

Camp Mysore dated the 21st June 1915.
24th

DIARY No. 3428 From



Rao Bahadur
T.V. Arumugum Mudaliar Esq.,
Sanitary Commissioner with the
Government of His Highness the
Maharaja of Mysore, Camp Mysore.

D.M. Narasinga Rao Esq., B.A., B.T.,
Secretary to the Government of His
Highness the Maharaja of Mysore,
General & Revenue Departments,
Bangalore

Sir,

I have the honor to submit herewith for the information and orders of Government copies of correspondence ending with my letter No. 2993 dated the 4th January 1915 addressed to the Inspector General of Education in Mysore on the subject of requiring students to produce a certificate of vaccination before they can be admitted to a school. The Inspector General fears that the enforcement of a rule of the kind would, in the present state of public enlightenment tend to scare away pupils from seeking admission into any school. Judging from the fact that the existence of the rule has not had any deterrant effect in the case of candidates appearing for the Mysore Lower Secondary Examination, there seems to me to be no reason to apprehend that the insistence of the production of the certificate at the initial stage would make any difference. The rule will ensure that all attending school are efficiently protected against small-pox and would provide for the first and not the least important step in the endeavour to bring about the conditions which the proposed systematic medical inspection of school children aims at.

at.

I have the honor to be,
S i r ,
Your most obedient servant,

Sanitary Commissioner.

P.H.

Letter No. 43 dated the 13th November 1914 from the Sub Assistant Surgeon, Malavalli to the Sanitary Commr.

-----:O:-----

In submitting herewith the vaccination statement for the month of October 1914 for your kind information and disposal, I beg to inform you that the students are admitted in all the schools, whether they are vaccinated or otherwise and it will be very difficult to vaccinate the unprotected cases after they are admitted. Under the circumstances it would be better, if every student is made to produce a Vaccination Certificate before he is admitted, which will greatly facilitate the vaccination work. I beg to request therefore that you will kindly bring the matter to the notice of the Inspector General of Education in Mysore for his favorable consideration.

Letter No. 2410 dated the 23rd November 1915 from the Sanitary Commissioner to the Inspector General of Education in Mysore.

-----:O:-----

In forwarding the accompanying copy of letter received from the Sub Assistant Surgeon, Malavalli, bringing to notice the desirability of requiring students to produce a vaccination certificate before they can be admitted to a school, I have the honor to recommend the measure as being worthy of adoption, as it would materially diminish the number of boys and children in the school unprotected against small-pox. A certificate of vaccination will be necessary only in cases where the teacher himself cannot find evidence of the boy having been vaccinated or having had small-pox or where the boy was not vaccinated at all ~~any~~ at any time previous to his presenting himself for admission.

2.

Letter No. 10126/1650 dated the 12th December 1914 from the Inspector General of Education to the Sany. Commr.

-----:0:-----.

With reference to your letter No. 2410 dated the 23rd November 1914 suggesting the desirability of requiring students to produce a vaccination certificate before they can be admitted to a school, I have the honor to inform you that while I recognise the beneficial effects of such a rule, I fear that in the present state of public enlightenment, the rule may scare away some of the boys from joining any school. With the spread of Compulsory Education in the State, it may, in the future, become feasible to enforce easily the rule referred to. believe, that in areas where compulsory vaccination has been notified, there will be no difficulty in insisting upon the production of satisfactory evidence of a pupil having been vaccinated.

Letter No. 2993 dated the 4th January 1915 from the Sanitary Commissioner to the Inspector General of Edn.

-----:0:-----

In acknowledging receipt, with thanks, of your letter No. 10126/1650 dated the 12th Ultimo on the subject of requiring students to produce a vaccination certificate before they can be admitted to a school, I have the honor to state that, in my opinion, the existence of such a rule would help to dispel the sense of insecurity which parents might entertain in allowing their children to mix promiscuously with unvaccinated children in the school. Besides, a rule of the kind would fit in very well with the system of the Medical Inspection of school children proposed to be introduced in Mysore.

Govt. are of opinion that it is premature to issue a rule about vaccination in the case of students seeking admission. If the Headmasters of Schools and the Sanitary Officers exert their Combined influence to induce parents, all unprotected boys in schools can be vaccinated with very little trouble.
